

# Real World Transformation

Geometry Vocabulary

Examples

# Reflection

This image represents Reflection because the trees are flipped over reflecting on the water.

# Translation

This image represents Translation because the image of the seats are all the same just moved or slid over.

# Rotation

This picture represents rotation because the petals on the flower rotate around the center of the flower.

# Dilation

This picture of the mama giraffe and the baby giraffe represents dilation because they are almost identical pictures but one is small and the other is bigger
